One Month Later...

This data is unlike anything I've ever worked with before. I don't even have the tools to process it! It's going to take me ages to write the software, I need to make sense of this. I wonder if someone has already starting working on this, wish there was an easy way to find out...

Meanwhile, in Vienna, Austria...

Later that week, they check their emails...

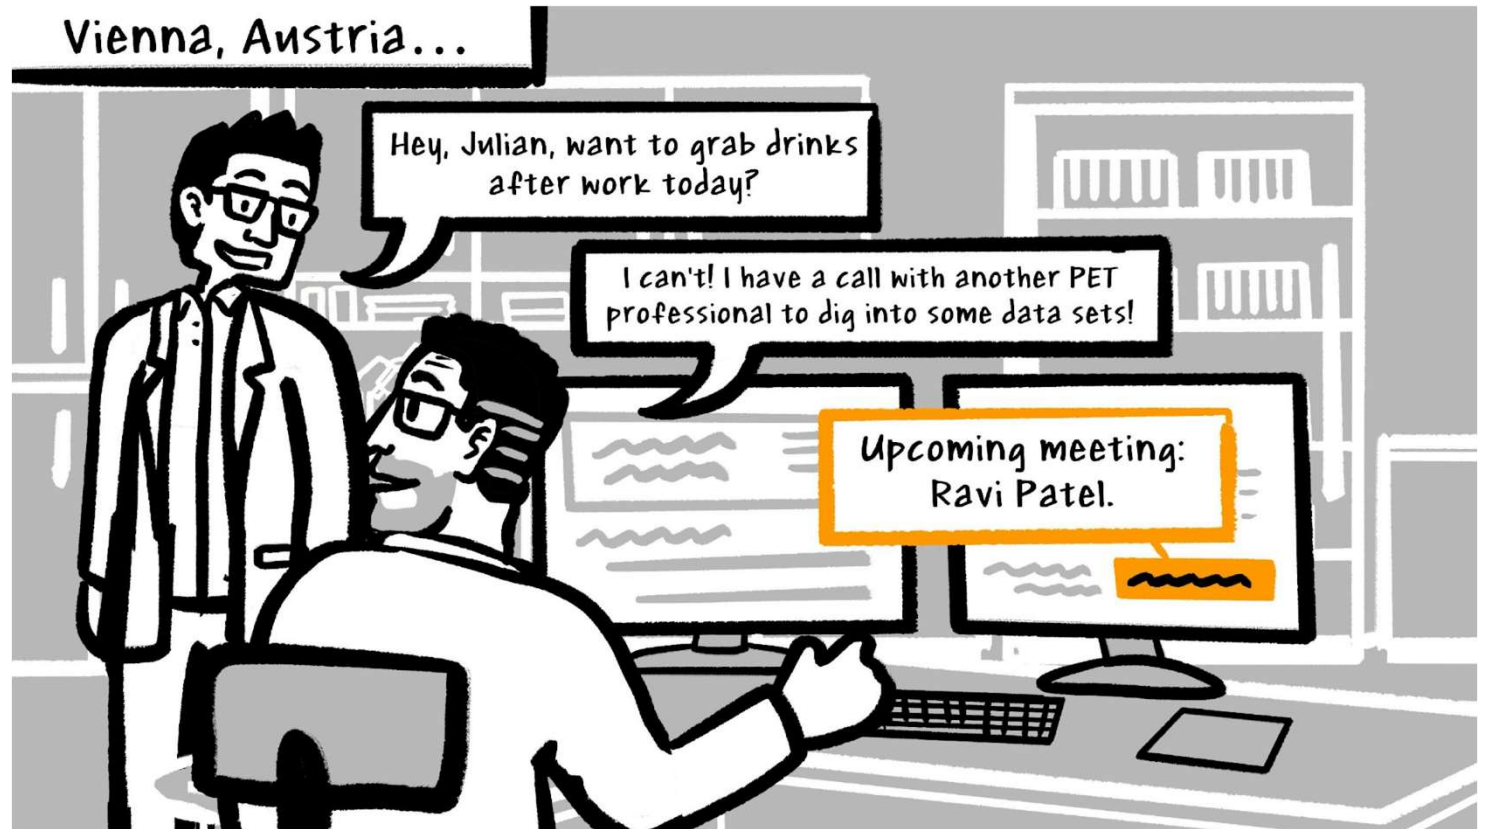

Calling all Medical Imaging Scientists!

Scanverse360 unites PET imaging professionals to solve common challenges, crowdsource ideas on TB PET data!

Vienna, Austria...

Later that week in California.

Wow, this is incredible! I can't believe how much progress you've made since I saw you last!

I know, right? It is amazing what community-driven open-source tools can do, we have now really opened the doors to understanding the true potential of this data!
